EDUCATION

Stanford University, B.S. in Design, AI + Digital UX

Expected 2028

- **Cumulative GPA:** 3.973/4.0
- **Relevant Coursework:** UI/UX Design, Visual Prototyping, Computer Graphics, Design for Play, Human Values in Design, Illustration and Concept Design, History of Design, Psychology, Statistics
- Minor in Creative Writing

EXPERIENCE

Product Design Intern

June 2026 - Sept 2026

Artifex Tinkers

Shenzhen, China

- Designed and launched 4 new aesthetic variants of a tabletop RPG hardware product, taking each from concept sketch to manufacture-ready design in collaboration with 3D modeling and engineering teams
- Resolved a size and proportion flaw found in usability testing, strengthening a visually driven design that earned 273 Kickstarter followers pre-launch
- Drove interaction design across the mobile app and Artifex website, prototyping a portal-themed swipe animation that made a core mobile action feel magical and adding interactive 3D elements to the website redesign so users could instantly understand the product's structure and function
- Halved the core user loop of a web app (14 clicks to 7) through a low-fidelity redesign, simplifying an action-heavy experience to reduce user confusion

Product Design Associate

June 2025 - June 2026

Quantum AI Institute (QAI)

San Francisco, CA

- Designed sponsor decks and branded digital assets (LinkedIn graphics, event banners, style guidelines), establishing QAI's visual identity and contributing to successful fundraising and social presence growth
- Integrated AI agent (Paradigm AI) into pre-existing workflow to automate data-insertion, improving spreadsheet enrichment efficiency by 95%

Product Design Intern

May 2025 - Sept 2025

Second Time Founders (2TF)

San Francisco, CA

- Built and shipped the 2TF Notion Founder Directory, combining data management and UX design to organize 600+ founder entries and power peer-to-peer networking across the full 2TF community
- Conducted 6 founder interviews to inform directory structure and design decisions; produced a series of Loom video tutorials on directory navigation to drive user adoption

PROJECTS

Indie Game Dev

June 2024 - Present

Chiasma Team

[\(Watch Demo Video\)](#)

- Sole designer and developer for sci-fi visual novel "Watchtower 72", owning the complete product pipeline (concept art, UI system, illustration, and code) and collaborating with a game writer to translate narrative vision into a cohesive retro-space experience across menu and story screens

SKILLS

Tools

Figma, Adobe Photoshop, Blender, Miro, Github, React.js

Programming Languages

HTML, CSS, JavaScript, Ren'py

Methods

UI Design, Interaction Design, Wireframing, Prototyping, User Research, Physical Design, Human-Centered Design, Design Systems, Illustration
